

## **eLuminate™ Course 1: Fundamentals of Proactive Quality Management**

The establishment and utilization of leading practices for Proactive Quality Management and Quality Oversight of outsourced clinical projects are essential for both sponsors and CROs to achieve the right balance between meeting timelines, ensuring cost containment, driving compliance, and achieving the highest level of quality.

**Gain a comprehensive understanding of the fundamentals of quality oversight.**

**In this self-paced online learning course, clinical research professionals will:**

- Gain a thorough understanding of the eight key components of quality oversight.
- Learn solutions to address your organization's gaps in quality oversight.
- Go beyond your own knowledge and learn from Avoca Quality Consortium<sup>®</sup> subject matter experts about industry-wide experiences and leading practices.

**This course is right for you if your organization:**

- Does not have an effective or fully-implemented vendor oversight approach.
- Does not have adequate resources to design, develop, or implement a quality oversight framework.
- Does not have the knowledge or expertise on the various elements of quality oversight.
